Projects Portfolio

NEON-TECH Landing Page – Advanced HTML & CSS Animation Project

Completed

(https://neon-tech-ivory.vercel.app/)

Jan 2024 - Feb 2024

HTML5 CSS3 JavaScript

A cyberpunk-themed landing page featuring advanced CSS animations, neon glow effects, glitch text, and smooth parallax scrolling. Built with HTML, CSS, and Bootstrap to demonstrate strong front-end fundamentals, accessibility, and performance optimization.

Key Achievements:

- Designed and implemented a cyberpunk UI with neon glow effects and glitch text animations
- Built complex layouts using CSS Grid and Flexbox with cross-browser fallbacks
- Implemented smooth parallax scrolling and animation timing for immersive UX
- Achieved 100% Lighthouse accessibility score through semantic HTML and ARIA practices
- Optimized performance using lazy loading, asset compression, and efficient CSS

Premium Glassmorphism Product Showcase Landing Page

Completed

(https://luxelandingpage.vercel.app/)

Feb 2024 - Mar 2024

HTML5 CSS3 Bootstrap JavaScript

A premium product showcase landing page built with a glassmorphism design system, featuring frosted glass UI, animated gradients, and interactive 3D card effects. Developed using HTML5, CSS3, and Bootstrap to deliver a refined, luxury-focused user experience.

Key Achievements:

- Implemented a glassmorphism UI with frosted glass panels and layered blur effects
- Built interactive 3D card components with mouse-responsive tilt animations
- Designed animated gradient backgrounds to enhance visual depth and engagement
- Created smooth transitions and micro-interactions for a premium user experience
- Ensured responsive layout and cross-browser compatibility using modern CSS techniques

Modern SaaS Landing Page Built with Tailwind CSS

Completed

(https://nexus-orcin-kappa.vercel.app/)

Mar 2024 - Apr 2024

Tailwind CSS | JavaScript | HTML5 | CSS3

A modern SaaS landing page built with Tailwind CSS, featuring animated mesh gradients, floating blob animations, and scroll-triggered interactions. Designed as a full marketing website with sections for features, pricing, and testimonials, optimized for conversion and clean maintainable code.

Key Achievements:

- Built a complete SaaS marketing website using Tailwind CSS utility-first architecture
- Implemented animated mesh gradient backgrounds and floating blob visual effects
- Added scroll-triggered animations to enhance user engagement and page flow
- Structured reusable layout sections for features, pricing, and testimonials
- Optimized conversion paths using strategic CTAs and social proof placement

Vanilla JavaScript Task Management Application

Completed

(https://taskmaster-indol-five.vercel.app/)

Apr 2024 - May 2024

JavaScript | HTML5 | CSS3

A feature-rich task management application built with vanilla JavaScript, demonstrating advanced DOM manipulation, ES6+ features, and object-oriented architecture. Includes drag-and-drop task management, real-time search, filtering, and persistent state using localStorage.

Key Achievements:

- Built a complete task management application using vanilla JavaScript without external frameworks
- Implemented class-based architecture to manage application state and logic
- Added drag-and-drop task reordering using native HTML5 APIs
- Developed real-time search, filtering, and sorting functionality
- Persisted user data with localStorage and optimized DOM updates for performance

React E-Commerce Platform

Completed

May 2024 - Jul 2024

React JavaScript CSS3

Full-featured e-commerce platform with shopping cart, product filtering, and checkout flow.

Key Achievements:

- Built with React Hooks (useState, useEffect, useContext)
- Implemented React Router for seamless navigation
- Created reusable component library with prop validation
- Added state management with useReducer for complex state

Firebase Real-Time Chat Application

Completed

Jul 2024 - Sep 2024

React Firebase Tailwind CSS

Real-time messaging application with user authentication, file uploads, and online presence.

Key Achievements:

- Implemented Firebase Authentication with email/password
- Built real-time messaging using Firestore listeners
- Added file upload functionality with Cloud Storage
- Created user presence detection and typing indicators

Work Experience

Freelance Full-Stack Developer

Jan 2023 - Present

Self-Employed

Remote

- Developed and deployed full-stack web applications using React, Node.js, and Firebase
- Collaborated with clients to gather requirements and deliver custom solutions on time
- Implemented responsive designs and optimized performance across all projects
- Maintained codebases with Git version control and provided ongoing technical support

Education

Bachelor of Science in Computer Science

2019 - 2023

University Name

City, Country

- Graduated with First Class Honors (GPA: 3.8/4.0)
- Relevant coursework: Data Structures, Algorithms, Web Development, Database Systems, Software Engineering

Certifications & Awards

Meta Front-End Developer Professional Certificate

Coursera

2024

JavaScript Algorithms and Data Structures

freeCodeCamp

2023

Responsive Web Design Certification

freeCodeCamp

2023
